Order Process:

Lead-time: 7 working days from receipt of order and full payment.

Pricing excludes courier / delivery
KITA is not registered for VAT therefore no VAT is applied

The National Department of Health has recommended that South Africans should:

Wash our hands regularly with soap or an alcohol-based sanitizer.

Avoid touching our eyes, nose, and mouth with unwashed hands.

Avoid close contact with those who are sick.

Cover our cough or sneeze with a flexed elbow or a tissue, then throw the tissue in the bin.

Clean and disinfect frequently touched objects and surfaces.

How to use alcohol-based hand sanitizer

Use an alcohol-based hand sanitizer that contains at least 60% alcohol.

Supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in schools and childcare facilities.

APPLY enough product on hands to cover all surfaces.

RUB hands together, until hands feel dry.

This should take around 20 seconds.

Note: Do not rinse or wipe off the hand sanitizer before it's dry; it may not work as well against germs.

KITA Fundamentals Alcohol Hand Sanitizer Liquid properties:

Active ingredients: Ethyl 96.4% / Isopropyl 99.9%
Alcohol, Benzalkonium Chloride Solution 50%

KITA Fundamentals Alcohol Hand Sanitizer Liquid benefits:

- Based on SABS approved formulation
- Alcohol-based as recommended by the Department of Health
- Benzalkonium has antiseptic and antibacterial properties
- Absorbs quickly and does not dry out the skin
- Can be used on both skin and surfaces
